

Input module

AIM

Data sheet

Input module for COBS Alert Systems

General

The input module AIM-8 is used in the COBS ALERT SYSTEM to generate alarms with preprogrammed text and alarm signals.

Connection

AIM is connected via an RS485 bus to our message server CMS for instant forwarding of alarms and messages to other devices in a system.

Monitoring

The device can continuously be monitored via COBS Message Server.

Technical data

- AIM-8
- 8 opto inputs
- Text message with 36 characters
- 15 different alarm signals
- Ability to determine time out from 1-2550 seconds
- Repeat alarm at intervals from 1-2550 seconds.
- Size (L x W x D) 123 x 72 x 30 mm
