

BENEFITS

The COBS Mobile application for alert and personal alarm makes it possible to distribute messages, as well as interact among mobile users and connected on-premises systems.

The COBS Mobile app connects to COBS backend system and integrates to on-premises systems such as Nurse Call Systems, Situation Awareness Systems (SAS), Physical Security Information Management (PSIM), Fire, Security and Access Control Systems, and more.

The COBS Mobile app provides a user-friendly interface and tool for the professional first-line workers and enables faster response times plus improved safety and security to corporate assets and resources.

DESCRIPTION

The COBS Mobile app connects mobile users to the COBS Messaging System situated on the customer premises with COBS Alarm Media Gateway and Integration Engine for distribution of alarms, alerts and messaging.

Through a defined set of rules, the event handler transmits notifications quickly and reliably to the required people and teams, with technical and user acknowledgements that are then fed back to the initiators.

Through the confirmation function, the COBS backend system receives qualified feedback on the availability and response times of your teams and can initiate an automatic escalation if necessary.

COBS Mobile App Features:

- Icon based and color-coded alert messages and alert tones
- Positive and negative acknowledgements (ACK/NACK)
- Personal protection and assault alarm (in-app icon and/or Physical red alarm button on Versity handsets)
- Alarm history
- Login and logout of alarm groups
- Encrypted communication

COBS Mobile is available on the [Google Play Store](#) and [Apple App store](#).

NOTE: To utilize the COBS Mobile app, your facility must have an installed COBS Messaging System with associated user license, configuration, and connectivity for your specific facility.

SPECIFICATIONS

INTEROPERABILITY (Verified mobile devices)

- Versity 96xx series
- Samsung Xcover
- iOS

COBS Mobile app is compatible with other Android devices but has not been verified on other devices than the device listed above.

COBS Virtual Alarm Media Gateway

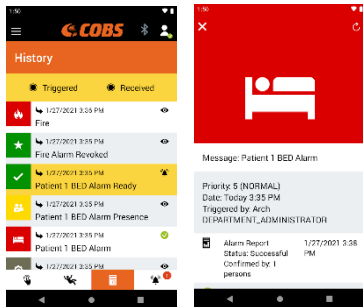

- 2 interface licenses to run a Virtual Alarm Media Gateway.

COBS Alarm Media Gateway 100 (w/o LTE)

- Fanless
- Intel® Celeron™ J1900 Processor
- CPU frequency 2 GHz
- CPU cores 4
- L2 cache 2 MB
- RAM DDR3L 2GB
- 64 GB industrial hard drive
- 12-24 VDC
- Dimensions (WxHxD) 106 x 30 x 85 mm
- Weight 410g
- DIN Rail mount
- Operating temperature range -20 - +50 °C

COBS Alarm Media Gateway 200 (w/ LTE)

- Fanless
- Intel® Atom™ x7-E3950 Processor
- CPU frequency 1.6 GHz
- CPU cores 4
- L2 cache 2 MB
- RAM DDR3L 8GB
- 64 GB industrial hard drive
- Integrated dual SIM LTE mobile modem
- 9 - 36 VDC
- Dimensions (WxHxD) 64 x 140 x 92 mm
- Weight 830g
- DIN Rail mount
- Operating temperature range -20 - +70 °C

Part No.	Description
CMG-0100	COBS Alarm Media Gateway 100 (w/o LTE)
CMG-0200	COBS Alarm Media Gateway 200 (w/ LTE option)
CMG-VM10	COBS Alarm Media Gateway – Virtual
CMB-0010	COBS Mobile SaaS base (monthly fee, min. 36 months)
CMU-0010	Additional User license bundle for up to 10 users (monthly fee, min. 36 months)
